SAP ABAP Developer

Description

ONETool Solutions, Inc. is an innovative IT solution provider, whose focus is to support companies and organizations with their digital transformation goals by realizing fast and agile change in their processes and applications. ONETool Solutions, Inc. was founded in 2012.

For the support of our solution delivery team, we are looking for a SAP ABAP Software Engineer with passion for innovative software solutions and working together with the team on projects for our clients.

Responsibilities

As a Software Engineer at ONETool Solutions your responsibilities will be:

– Develop, Test, Deploy and Maintain Software Components and Applications
– Develop, Test, Deploy and Maintain Business Process Implementations
– Analyze, Understand and Engineer requirements
– Troubleshoot, Investigate and solve issues
– Create Test-Data and Test transactions either in API Services or Business Processes Services
– Create and Maintain Documentation of the Software Components developed
– Handle new development tasks as well as providing support for existing systems and services
– Reporting on project progress to the project team lead

Qualifications

– Strong ABAP core skills (with Finance ABAP program experience is preferred)

– Experience in building OData services/RESTful APIs within SAP is a must

– Experience in gateway integration or consuming RESTful APIs from SAP (cl_http_client)

– Preferably with SAP BTP or SCP (SAP Cloud Platform) experience

– Experience or Ability to do solutioning work: organizing requirements, designing, building, deploying scalable APIs

– Excellent communication skills: you understand user needs and can translate them into actionable pieces of work.
